Dear FIELD(MrMs) FIELD>Last):

There are 59 locations in Miami-Dade County where quiet, neighborhood streets, like yours, could be opened to increased cut-thru traffic by building a bridge over a canal. The one to the right is near your home.

Your County Commissioner, Oliver Gilbert, sits on a committee that is about to vote on the first of these 59 possible canal-bridges, which would be on SW 87th Avenue in Palmetto Bay.

Please join with us in urging the Commissioner not to set this dangerous precedent, which could eventually lead to a bridge near your home, and instead **vote against** the SW 87th canal-bridge. You can reach Commissioner Gilbert at 305-375-5694 or district1@miamidade.gov

You'll find further detail on the 59 canal-bridges and the implications for the safety and tranquility of neighborhoods like yours at the Miami-Dade Safe Street Alliance webpage: ceds.org/mssa. While there please add your name to the many other canal neighbor residents countywide who've signed our petition opposing canal-bridges. Lastly, please urge your neighbors to contact the Commissioner too. I can be reached at 410-654-3021 or Rklein@ceds.org if you have any questions. I was hired by the Alliance to coordinate their efforts to protect neighborhoods like yours from increased cut-thru traffic.

Sincerely,

Richard Klein,
Alliance Coordinator
